

THE PREMIUM B2B PLATFORM FOR ASEAN COMPOSITES

COMPOSITE BRIDGE
Bangkok 2027

QSNCC, Bangkok | May 25-26 , 2027

Composite Bridge is Southeast Asia's premier 2-day industrial exhibition and conference exclusively engineered to bridge international advanced material providers with the booming manufacturing hubs of the ASEAN region. Operating at the heart of the 'China Plus One' economic shift, CB is not just an exhibition—it is a business sanctuary designed to accelerate local supply chain integration, regional trade, and technological partnerships.

WHY THAILAND & ASEAN?

The "China Plus One" Epicenter:

Global OEMs are rapidly diversifying their production lines. Thailand and Vietnam have emerged as the primary manufacturing alternatives for advanced industries.

The Automotive & EV Hub:

Thailand is the "Detroit of Asia," now transforming into the leading regional production ecosystem for Electric Vehicles.

Unprecedented Aerospace & Drone Growth:

Driven by regional fleet expansions, commercial MRO demands, and massive advancements in local defense and commercial UAV manufacturing

1. THE BUSINESS SANCTUARY (The Trade-Show):

A premium, curated exhibition environment cross 2 main halls at the QSNCC. Unlike overcrowded, noisy commercial fairs, CB restricts access to professional, qualified profiles, ensuring that exhibitors can hold strategic, uninterrupted technical and business discussions right on the show floor.

2. PRECISION MATCHMAKING (The Business Meetings):

We do not leave networking to chance. Powered by a proactive pre-qualification engine, our Business Meetings program delivers an individual, optimized schedule of face-to-face appointments between suppliers and targeted buyers from regional End-Users.

3. STRATEGIC INTELLIGENCE (The CB Conferences):

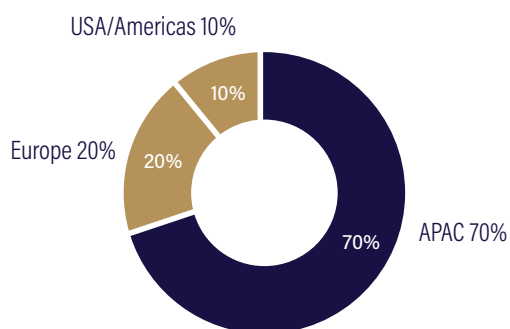

Two days of high-level conferences led by global and regional industry experts. Sessions directly tackle operational deployment, materials processing innovations, lightweighting regulations, and strategic supply chain engineering within APAC.
